

# Integration with Shopify eCommerce

Countless online shopping websites are enticing consumers to choose them over their competitors – and with competition being a mix of big brands and up-and-coming local shops, creating a memorable customer experience is paramount for success. But low prices, free shipping offers, and easy returns have become the norm, and consumers expect businesses to cater to their needs. Before your customers go online looking for those fantastic deals, your website must be ready and fully integrated. Experience the benefits of integrated eCommerce working for you with out-of-the-box integration between SAP Business One and Shopify to ensure your online store is ready for anything the future holds. Shopify is sold separately.

- Eliminate manual duplication of work
- Streamline campaign execution
- Feature-rich catalogue capabilities
- Easy-to-use drag-and-drop mapping interface
- Order and payment processing
- Real-time shipping and inventory
- Customer data management in one place

## Approach:

**aclaros** utilizes the SAP Integration Framework (B1iF) solution as its primary means of integrating SAP Business One with third-party applications. SAP's Integration Framework is SAP's proprietary middleware solution that is embedded into the standard SAP Business One ERP solution. SAP B1iF enables bi-directional integration with internal or external solutions by providing the building blocks for integration using pre-configured scenarios and custom scenarios to streamline and automate specific business processes.

*\*Custom Integration Scenarios also available.  
Please contact us for Pricing.*
